

Cityforum & Wilton Park

Virtual Cyber Security Series 2020 – 2021

The Cityforum **Cyber Security Summit** is in its twelfth year. Working once again in association with the NSA (National Security Agency), and for the first time partnering with Wilton Park, this cyber series has already attracted a truly international audience.

This highly regarded annual cyber summit has been reshaped into a comprehensive series of webinars and private webclave discussions, to include speakers and guests at the highest level.

The series '**Building National and International Capacity to Recover from Catastrophic Events - Thinking Through what Governments Should Do**' began in 2020 with a Masterclass – Analysis, Agility and Assurance - A View from the Agencies chaired by Sir David Omand *former UK Security and Intelligence Coordinator and former Director GCHQ* in discussion with:

- Mr George Barnes *Deputy Director* National Security Agency
- Dr Niel Kempson *Senior Advisor* Raytheon UK (Also an Associate of Cityforum)
- Mr Gaven Smith *Director General for Technology* GCHQ

This was followed by a webinar discussing political challenges. The Chair, Sir David Omand was joined by:

- Congressman James Langevin *Commissioner* Global Cyber Solarium Commission
- Rt Hon James Brokenshire MP *Minister of State for Security* Home Office
- Rt Hon Dominic Grieve QC *former Chair* Intelligence & Security Committee, *former UK Attorney General*
- Ms Kiersten Todt *Managing Director* Cyber Readiness Institute
- Mr Adam Hadley *Executive Director* Tech Against Terrorism

As the series continues into 2021, Cityforum has a limited number of sponsorship opportunities for your organisation to be involved in how this programme develops. The participants for the remainder of series are now being invited.

Planned for 2021 are two further private, interactive webclave discussions for approximately 30 invited participants, held under the Chatham House Rule and one significant extended webinar open to attendees from across the public and private sectors, academia and charitable organisations. A concluding podcast will round off the series.

The themes of the second half of the Cyber Series are under discussion with stakeholders, and early involvement by industry partners will offer a greater level of consultation on the programme, ensuring your business objectives are fully met.
