The Twelfth Cityforum Cyber Security Summit
A programme of webclaves and conclaves prepared in association with the National Security Agency and in partnership with Wilton Park

Building National and International Capacity to Recover from Catastrophic Events
Thinking Through what Governments Should Do

Webinar: Criminality and Disorder, Terror and Disruption - Meeting the societal and economic threats
Tuesday 13th April 2021 – start time 12:00 BST (07:00 EDT) - live event   Sponsor information

In partnership with

Wilton Park brings fresh thinking to the development of international policy, advancing practical solutions to critical global issues. We have been building and curating trusted global networks, connecting the public, private and third sector in dialogue, for over 70 years. We mix experience, with new voices – todays' policy leaders, decision makers and influencers connect with those of tomorrow. Together we develop new perspectives and deliver innovation in international policy. Our networks endure, with the conversation, collaboration and impact continuing long after the event ends.

We run around 70 events a year, facilitating dialogue wherever it is needed. Online, hybrid, face-to-face events run in the UK, internationally or from our secluded 16th century home in the English countryside. From short dialogues to residential and series dialogues, we work in partnership to help define objectives and design outcome driven solutions. As a part of the UK's Foreign, Commonwealth and Development Office (FCDO), we support British foreign policy priorities and are core to the UK's public diplomacy work. The networks we build and nurture create a lasting sense of connection to both Wilton Park and the UK.

Our priorities include:
- Conflict prevention, resolution and state building
- Defence and security
- Global economy
- Human rights, good governance and faith
- Multilateral institutions, key countries and regions
- Sustainable development and the environment

About Raytheon UK

With facilities in Broughton, Waddington, Glenrothes, Harlow, Gloucester and Manchester, Raytheon UK is invested in the British workforce and the development of UK technology. Across the country the company employs 1,700 people. As a prime contractor and major supplier to the UK Ministry of Defence, Raytheon UK continues to invest in research and development, supporting innovation and technological advances across the country.

Raytheon UK is a landed company, part of the Raytheon Technologies organisation and sits within the Raytheon Intelligence & Space business

About Raytheon Technologies

Raytheon Technologies Corporation is an aerospace and defence company that provides advanced systems and services for commercial, military and government customers worldwide. It comprises four industry-leading businesses – Collins Aerospace Systems, Pratt & Whitney, Raytheon Intelligence & Space and Raytheon Missiles & Defence. Its 195,000 employees enable the company to operate at the edge of known science as they imagine and deliver solutions that push the boundaries in quantum physics, electric propulsion, directed energy, hypersonics, avionics and cyber security. The company, formed in 2020 through the combination of Raytheon Company and the United Technologies Corporation aerospace businesses, is headquartered in Waltham, Massachusetts.

Surevine build secure, scalable collaboration environments for the most security conscious organisations who need to share highly sensitive information; joining people up securely and enabling a real-time response to cyber threats and incidents. Threatvine, built by Surevine, is an information sharing platform designed for secure cross-organisational collaboration and analysis. Threatvine unites financial services and wider critical national infrastructure, law enforcement and academia, moving beyond cyber-security information sharing to collaborative cyber-security intelligence analysis. Threatvine can help minimise risk and reduce fears, by allowing you to work together to be proactive and prepared against cybercrime; keeping you one step ahead of the cyber threat. Threatvine was built for the UK NCSC to power CiSP, the UK's national platform for cyber security information sharing. It was described by the Financial Times at launch as a "secure Facebook for cyber threats." Threatvine's appeal is global, from Japan to Brazil, and it enables compliance with regulations, such as NISD, mandating cyber incident reporting. It uses data integrations, including MISP, to allow enriched data analysis, which combined with the collaboration between people, means you can get real intelligence from your threat intelligence.
